THE PARTIAL FULFILMENT OF DEGREE OF**

BACHELOR OF SCIENCE

2020 – 2023

DECLARATION

I, VADAMODULA SAIMANOJ, Student of II BSc – M.P.C, Mrs. A.V.N College, affiliated to Andhra University here by declared that this project entitled “**Survey on Screening report of WATER POLLUTION at PORT area**” is a genuine work carried out by me under the guidance of **MSS.B.VEENITHA** lecturer in English, MRs A.V.N College, Visakhapatnam, Andhra Pradesh. Furthermore, this project work was not submitted to any other institution or University for awarding any Degree.

Instructions to Students for Community Service Project

Please read the detailed Guidelines on Community Service Project hosted on the website of AP State Council of Higher Education <https://apsche.ap.gov.in>

Link:

<https://apsche.ap.gov.in/Pdf/Guidelines%20for%20the%20OJT%20Internship%20Community%20Service%20Project.pdf>

1. It is mandatory for all the students to complete 2 months (180 hours) of Community Service Project as a part of the 10-month mandatory internship/on the job training.
2. Consider yourself a committed volunteer in the community, you work with.
3. Every student should identify the village/community/habitation for Community Service Project (CSP) in consultation with the College Principal/the authorized person nominated by the Principal.
4. Report to the community/habitation as per the schedule given by the College. You must make your own arrangements for transportation to reach the community/habitation.
5. You will be assigned a Faculty Guide from your College. He/She will be creating a WhatsApp group with your fellow volunteers. Post your daily activity done and/or any difficulty you encounter during the programme.
6. You should maintain punctuality in attending the CSP. Daily attendance is compulsory.
7. You are expected to learn about the community/habitation and their problems.
8. Know the leaders and the officials of the community/habitation.
9. While in the project, always wear your College Identity Card.
10. If your College has a prescribed dress as uniform, wear the uniform daily.
11. Identify at least five learning objectives in consultation with your Faculty Guide. These learning objectives can address:
 - Information about the community, including the realities and

problems of the society.

- Need for creating awareness on socially relevant aspects/programs.
 - Acquiring specific Life Skills.
 - Learning areas of application of knowledge and technologies related to your discipline.
 - Identifying developmental needs of the community/habitation.
12. Practice professional communication skills with team members, and with the leaders and officials of the community. This includes expressing thoughts and ideas effectively through oral, written, and non-verbal communication, and utilizing listening skills.
 13. Be regular in filling up your Program Book. It shall be filled up in your own handwriting. Add additional sheets wherever necessary.
 14. At the end of Community Service Project, you shall be evaluated by the person in-charge of the community/habitation to whom you report to.
 15. There shall also be an evaluation at the end of the community service by the Faculty Guide and the Principal.
 16. Do not indulge in any political activities.
 17. Ensure that you do not cause any disturbance to the inhabitants or households during your interaction or collection of data.
 18. Be cordial but not too intimate with the people you come across during your service activities.
 19. You should understand that during this activity, you are the ambassador of your College, and your behavior during the community service programme is of utmost importance.
 20. If you are involved in any discipline related issues, you will be withdrawn from the programme immediately and disciplinary action shall be initiated.
 21. Do not forget to keep up your family pride and prestige of your College.
 22. Remember that you are rendering valuable service to the society and your role in the community development will become part of the history of the community.

CHAPTER 1: EXECUTIVE SUMMARY

The community service report shall have only a one-page executive summary. It shall include a brief description of the Community and summary of all the activities done by the student in CSP and five or more learning objectives and outcomes.

The present study "water pollution" in N.T.P. colony about to list out the port city Virakkhapattanam. which have several types of water pollutions, are there. Industrial sites, wastes water, world are major contributors to water pollution and also another causes include to water pollution.

The whole colony was divided into "70" quadrates of 700x400 meters. The surroundings untreated waste water directly contributes. chloramphenicol typhoid, fever and zeta virus.

CHAPTER 2: OVERVIEW OF THE COMMUNITY

About the Community/Village/Habitation including historical profile of the community/habitation, community diversity, traditions, ethics and values.
Brief note on Socio-Economic conditions of the Community/Habitation.

N.T.R colony is located in Virakhapatnam district in the state of Andhra Pradesh, India.

Water pollution is any chemical, physical change in the quality of water that has harmful effect of water pollution. Water pollution sources is oxygenide mandif waste mine drainage, modern washing powder and key chemical pollution ground water pollution.

Nutrient pollution which includes nitrates phosphates is leading type of contamination in fresh water.

CHAPTER 3: COMMUNITY SERVICE PART

Description of the Activities undertaken in the Community during the Community Service Project. This part could end by reflecting on what kind of values, life skills, and technical skills the student acquired.

In this area water pollution degrades the quality of the water in the water bodies. Many diseases can spread through waste water cause the disease of fever malaria.

Waste in water increases in the amount of organic waste in water bacteria use up the available oxygen.

Surface water and ground water are both important sources for community water supply needs.

Waste water directly contributes cholera, typhoid fever. For water pollution causes some disease.

ACTIVITY LOG FOR THE FIRST WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	Visited the study area and divided into colony for divisions.	Learned about water pollution types.	
Day - 2	Identify and tabulated the list of home members.	Studied types of pollution wastages.	
Day - 3	Identify and tabulated the number of members the line 1 and 2.	we locate the shortage of water bodies.	
Day - 4	Identify and tabulated the colony in line 3 & 4.	we observed note of water bodies pollution.	
Day - 5	Identify and the numbers list of 5th line	studied water pollution of causes.	
Day - 6	Studied the abundance of water pollution in whole one of N.T.R colony	learned identification of water pollution	

WEEKLY REPORT

WEEK - 1 (From Dt. 12-9-2022 to Dt. 18-9-2022)

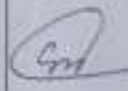

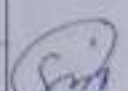

Objective of the Activity Done:

Detailed Report:

The waste from house holds, factories & agricultural lands gets discharged into rivers, canals, lakes. This waste can either be in the form of liquid waste, garbage & sewage. The harmful chemical coming out of this waste can damage aquatic life.

Not just the aquatic life, even when the humans end up. Drinking polluted water, they make themselves vulnerable to various life threatening illness like hepatitis, cholera, Typhoid and may also cause some disease.

ACTIVITY LOG FOR THE SECOND WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	The data obtained in 1st week is tabulated and studied.	learned about water pollution in the community area	
Day - 2	using the data and awareness camp has been conducted in the community	learned about how to make a campaign	
Day - 3	By the campaign creative awareness about the water pollution	learned about causes of water pollution in area	
Day - 4	The campaign has been continued and created awareness on value of pollution	learned about various threats facing by pollution the community area	
Day - 5	The campaign has been continued and created awareness about increasing water pollution area.	learned about various threats facing by pollution in community area	
Day - 6	The campaign has been continued and created awareness about protective measures of plants in the area	learned about protective measure to take to reduce of water pollution	

WEEKLY REPORT

WEEK - 2 (From Dt. 21-9-22 to Dt. 28-9-22)

Objective of the Activity Done:

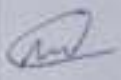

Detailed Report:

The pollution happens when water following down streams get contaminated at different points. A river may get polluted by sewage and industrial effluents. Waste water goes in the oceans, rivers, etc - - - - -

On the fact water especially fresh water is one of the most important elements in the world. However with increasing levels of water pollution.

The oxygen levels in polluted water is lower this causes the death of several organisms. Drinking water should be safe for consumption. Water is required in the body and depends on several factors including maintaining health.

ACTIVITY LOG FOR THE THIRD WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day -1	The data obtained 1st and 2nd weeks is analysed.	learnt about how to prepare a data analysis.	
Day -2	The analysed data is written on the paper in required manner	learnt about methods of data presentation	
Day -3	The pictures has been collected which were taken during campaign.	learnt about methods of data presentation.	
Day -4	Pie charts and tabulated forms were prepared.	learnt about preparation of tabular forms	
Day -5	Information obtained is updated in the data report.	learnt about information updated in the data request.	
Day -6	The reported data is self verified once again	learnt about how to prepare and report data analysis.	

WEEKLY REPORT

WEEK - 3 (From Dt. 7-10-22 to Dt. 13-10-22)

Objective of the Activity Done:

Detailed Report:

Water pollution is the cause of our undisciplined action and irresponsibility. As humans are only creating problems that are frequently water is essential to our body.

It cause such sickness and disease that will body effect our health. Let us not destroy it nor pollute it. We need and we should help same are our mother nature.

The pollution happens when water following down streams get contaminated at different point water not only our thirst but also plays a critical role in keeping us healthy.

ACTIVITY LOG FOR THE FORTH WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	The community project report programme book were downloaded and print out has been.	People in several years using minerals to drink	
Day - 2	The data obtained and prepared literature were entered in the program book	facilities should be created.	
Day - 3	The picture taken during project were printed and fixed in the program book	Awareness should be created in N.T.P colony.	
Day - 4	The pictures taken during project were printed and fixed in the program book.	People are in N.T.P colony are using filter	
Day - 5	The programme book papers are arranged in order and verified once again.	People are suffering with disease due to drinking	
Day - 6	The programme book has given to binding Pde work.	People are affordable to drink municipal water.	

WEEKLY REPORT

WEEK - 4 (From Dt. 19-10-24 to Dt. 25-10-24)

Objective of the Activity Done:

Detailed Report:

Ground water it is a source of a water that is under the land surface. It is accessible by wells, tube wells and hand pumps.

Surface water: This type of source is found on the surface of the earth like ponds, rivers, etc. ---

Rain water: It is the major source of water from rains. Chlorine and chloramine are the major used in public water systems.

Safe and readily available. Drinking water is key to public health. Community water systems and water safety plans are important ways to ensure the health of community.

ACTIVITY LOG FOR THE FIFTH WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	Few people are drinking mineral water in Shivolegaon.	People in N.T.F colony purifying mineral water.	officer
Day - 2	Some people are receiving the municipal water.	Drinking municipal water in their area.	officer
Day - 3	Many people are affordable to drink the ground water.	They are affordable to drink the ground water.	officer
Day - 4	Some people are suffering with joint pains by drinking water.	Drinking polluted water.	officer
Day - 5	Many people are using pit water. Sanitation in N.T.F colony.	Good facilities are should be created.	officer
Day - 6	Many people are getting the water from outside due to water pollution.	Sanitation should be created here N.T.F colony.	officer

WEEKLY REPORT

WEEK - 5 (From Dt. 26-10-22 to Dt. 31-10-22)

Objective of the Activity Done:

Detailed Report:

Water pollution is the cause of our undisciplined action and irresponsibility. We humans are only creating problems that can frequently water is essential to our body.

It cause your sickness and disease that will body effect our health. Let us not destroy it nor pollute it. We need and we should help some are our mother nature.

The pollution happens when water following down streams get contaminated at different point water not only our thirst but also plays a crucial role in keeping us healthy.

ACTIVITY LOG FOR THE SIXTH WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	Few people are drinking mineral water in Shivalayam.	Peoples in N.T.F colony preferring mineral water.	
Day - 2	Some people are receiving the municipal water	Drinking water in their area	
Day - 3	Many peoples are off to die due to drink the ground water.	They are off to die to drink the ground water.	
Day - 4	Some peoples are suffering with joint pains and drinking water	Drinking polluter water.	
Day - 5	Many peoples are facing poor water facilities in N.T.F colony	Good facilities are should be created.	
Day - 6	Many peoples are getting the water from ducts water pollution	Kitchens should be created here N.T.F colony	

WEEKLY REPORT

WEEK - 6 (From Dt. 2-11-22 to Dt. 9-11-22)

Objective of the Activity Done:

Detailed Report:

Water pollution is the cause of our underprivileged action and irresponsibility. All humans are only creating problems that are frequently water is essential to our body.

It causes such sickness and diseases that will badly affect our health. Let us not destroy it nor pollute it. We need and we should help some are our mother nature.

The pollution happens when water flowing down streams get contaminated at different point water not only our thirst but also plays a critical role in keeping us healthy.

CHAPTER 5: OUTCOMES DESCRIPTION

Details of the Socio-Economic Survey of the Village/Habitation Attach the questionnaire prepared for the survey.

Oxygen - Depletion Pollution:-

Another consequence of algal blooms is their consumption of oxygen supplies. This means that those species which depend upon oxygen to survive are killed off. Like anaerobic only thrive. Some anaerobic microorganisms are capable of producing ammonia, sulphide and other harmful toxins, which can make the water even more dangerous to animals and humans, too.

Surface water pollution:-

Referring to all water sources above ground, such as rivers, lakes, seas and oceans, surface water pollution can occur both naturally, accidentally, and intentionally.

Describe the problems you have identified in the community

- * N.T.R colony is rich in water resources have several benefits values most of the people in the area don't know their values.
- * Due to this they are refusing to protect them.
- * The people in this study area looking several valuable resources contaminated due to this improper conservation.
- * Due to insufficient knowledge the people in the area are refusing to conserve the plants and looked over pure water sources.
- * In the area of N.T.R colony peoples don't know the value of water.

Short-term and long-term action plan for possible solutions for the problems identified and that could be recommended to the concerned authorities for implementation.

Since the water pollution in the studied area are high level and their quantity is being shortage there is a necessity to conserve those, types of conserving the water sources.

- * Pick up litter and throw it away in garbage can.
- * Blow or sweep fertilizer back onto the grass. if it gets onto paved area. Don't put fertilizer on the grass right before it rains. The chemicals will wash into storm drains and water ways.
- * Wash our vehicles or outdoor equipment where it can flow to gravel or grassy area instead of a street.
- * Mulch or compost grass or yard waste.

Description of the Community awareness programme/s conducted w.r.t the problems and their outcomes.

The whole colony was facing the problem of water pollution. Most people affected of this pollution side effects. Like diarrhoea and vomiting, typhoid etc. Some of the people facing calcium deficiency and iron deficiency problems. Children and adults are also facing health issues for water pollution of drinking water.

The solution of these problems are and only awareness about water importance, and how to pollution avoid resources, and how to save our water bodies.

Report of the mini-project work done in the related subject w.r.t the habitation/village.

A mini-project work in the related subject w.r.t the habitation/village. (For ex., a student of Botany may do a project on Organic Farming or Horticulture or usage of biofertilizers or biopesticides or effect of the inorganic pesticides, etc. A student of Zoology may do a project on Aquaculture practices or animal husbandry or poultry or health and hygiene or Blood group analysis or survey on the Hypertension or survey on the prevalence of diabetes, etc.

The Report shall be limited to 8-10 pages.

Water Pollution:

Water pollution is the contamination of water in water bodies such as rivers, oceans, lakes and swamps, this means that one or more substance have built up in water to extent of causing problems to people, animals and plants.

So whether or not water is considered to be polluted will depend on what that water was go to be used for.

causes of water pollution:

There are numerous causes of water pollution. The main ones are listed below.

Types of sources:

1. Point source:

* It is directly to be to influence. Here pollutant travels directly from source to water.

* Point source are easy to regulate.

* The main source of water pollution are as follows,

* Community waste water, include discharges from houses, commercial and industrial establishments connects to public sewerage systems.

2. Industrial waste: The industries discharge several inorganic and organic pollution which may have slightly toxic to the living beings.

3. Agricultural sources:

* Fertilizers contain major plant nutrients. Such as nitrogen phosphorus and potassium.

* excess fertilizers to many reach the ground water by leaching or may be mixed with surface water of rivers, lakes and ponds by runoff and drainage.

* Pesticides include, insecticides, fungicides, herbicides, nematocides, rodenticides and soil fumigants. They contain a wide range of chemicals such as chlorinated hydrocarbons.

4. Underground water pollution:-

* In India at many places, the ground water is threatened with contamination due to seepage from industrial and municipal waste to and effluents. Sewage channels and agricultural run off.

5. Marine Pollution:-

* Oceans are the ultimate sink of all natural and man-made pollutants.
* Rivers discharge their pollutants into the sea.
The sewage and garbage of coastal cities are also dumped into the sea.

6. Garbage: Plastics are non-bio degradable, mass plastic clog water bodies and contaminate water.
7. Urbanization: Urbanization is a key factor in increasing the amounts of water pollution.
8. Pumping solid waste: Humans, after carelessly dump their trash in the sea or near rivers.
9. Oil Spills: Accidental oil spills have devastating effect on seas.
10. Dissolved solid waste: Human polluting gas in the air can dissolve into salt and fresh water and pollute it.

Control Measures

* Riparian purification

* recycle.

* Treatment of sewage water and the industrial effluents should be done before releasing it water bodies.

* Hot water should be cooled before release from the power plants.

* Domestic cleaning in tanks, streams and rivers, which supply drinking water should be prohibited.

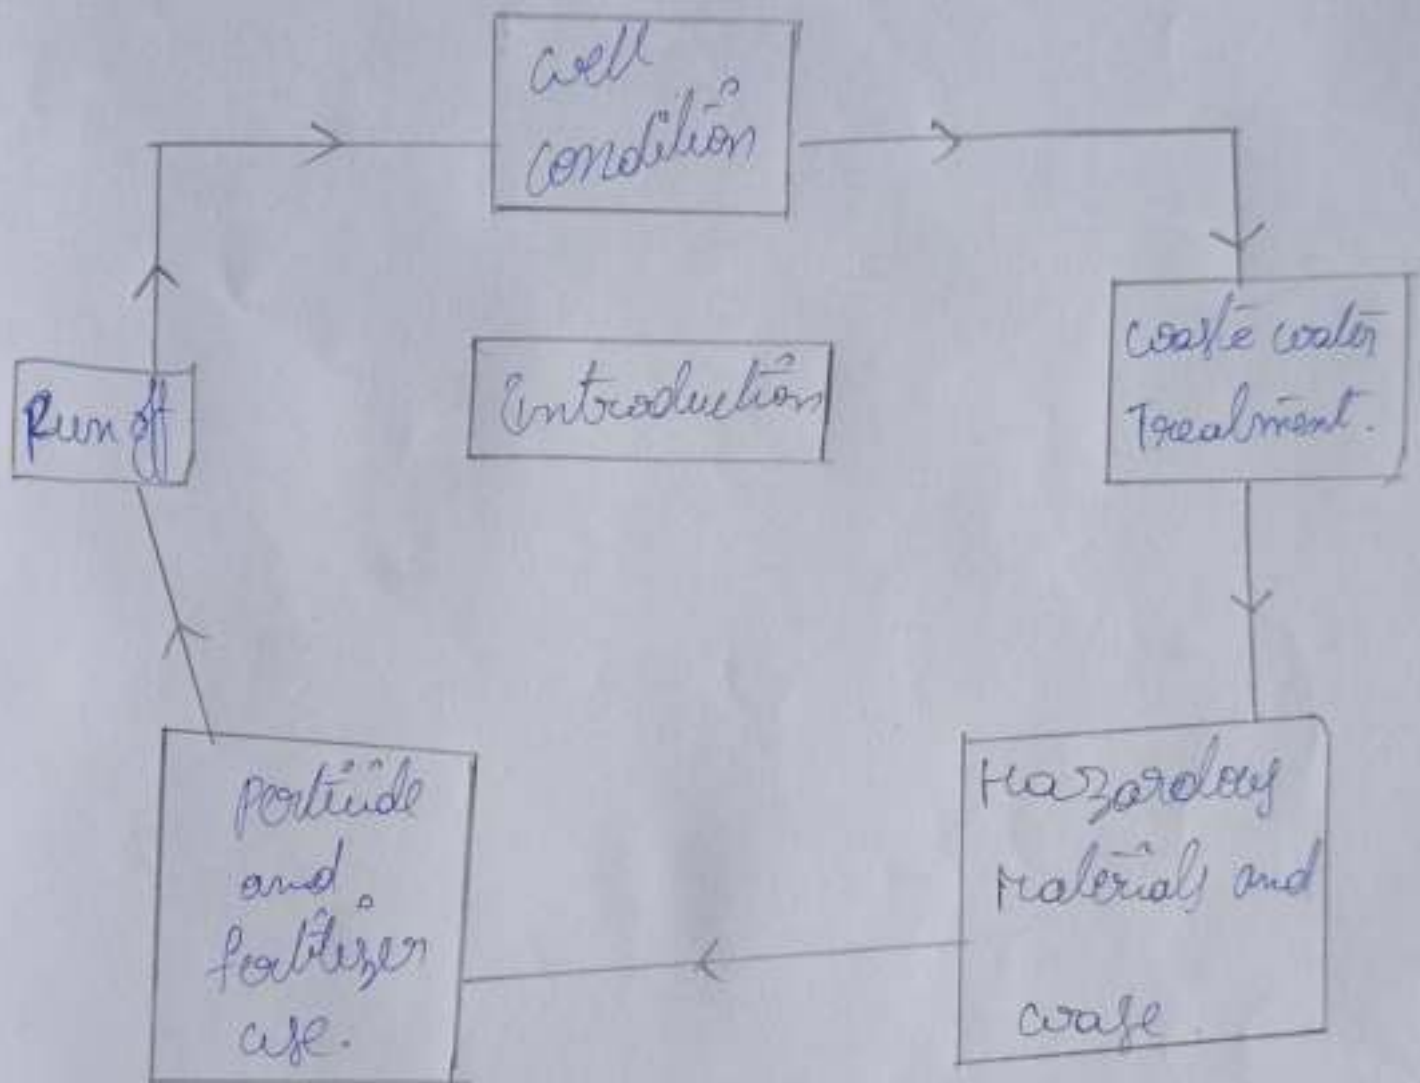

Ground water pollution:

* Any addition of considerable substance to groundwater caused by human activities is considered to be contamination if has.

after been assumed. That contaminants left on (3) under the ground will stay there.

Source of ground water pollution:

- * Most concern over ground water contamination has centered on pollution associated with human activities.
- * Human ground water contamination has centered on to waste disposal systems, land disposal of solid.
- * Municipal waste water, waste water impoundments and spreading of sludge. Brine. Disposed from the petroleum industry.
- * Mine waste, deep-cell herbicides and animal waste are agriculture source of ground.

Student Self-Evaluation for the Community Service Project

Student Name: Vadamedula SAJ MANOJ

Registration No: 780120805081

Period of CSP: From: To: Oct-01-Dec-28

Date of Evaluation:

Please rate your performance in the following areas:

Rating Scale: Letter grade of CGPA calculation to be provided

1	Oral communication	1	2	3	4	5
2	Written communication	1	2	3	4	5
3	Proactiveness	1	2	3	4	5
4	Interaction ability with community	1	2	3	4	5
5	Positive Attitude	1	2	3	4	5
6	Self-confidence	1	2	3	4	5
7	Ability to learn	1	2	3	4	5
8	Work Plan and organization	1	2	3	4	5
9	Professionalism	1	2	3	4	5

EVALUATION

Internal Evaluation for the Community Service Project

Objectives:

- To facilitate an understanding of the issues that confront the vulnerable / marginalized sections of society.
- To initiate team processes with the student groups for societal change.
- To provide students an opportunity to familiarize themselves with the urban / rural community they live in.
- To enable students to engage in the development of the community.
- To plan activities based on the focused groups.
- To know the ways of transforming society through systematic programme implementation.

Assessment Model:

- There shall only be internal evaluation.
- The Faculty Guide assigned is in-charge of the learning activities of the students and for the comprehensive and continuous assessment of the students.
- The assessment is to be conducted for 100 marks.
- The number of credits assigned is 4. Later the marks shall be converted into grades and grade points to include finally in the SGPA and CGPA.
- The weightings shall be:

○ Activity Log	20 marks
○ Community Service Project Implementation	30 marks
○ Mini Project Work	25 marks
○ Oral Presentation	25 marks
- Activity Log is the record of the day-to-day activities. The Activity Log is assessed on an individual basis, thus allowing for individual members within groups to be assessed this way. The assessment will take into consideration the individual student's involvement in the assigned work.
- While evaluating the student's Activity Log, the following shall be considered -
 - a. The individual student's effort and commitment.
 - b. The originality and quality of the work produced by the individual student.
 - c. The student's integration and co-operation with the work assigned.
 - d. The completeness of the Activity Log.
- The assessment for the Community Service Project implementation shall include the following components and based on Weekly Reports and

Outcomes Description

- a. Details of the Socio-Economic Survey of the village/habitation.
- b. Problems identified.
- c. Community Awareness Programs organized.
- e. Suggested Short-Term and Long-Term Action Plan.
