University

YEAR

Instructions to Students for Community Service Project

Please read the detailed *Guidelines on Community Service Project* hosted on the website of AP State Council of Higher Education <https://apsche.ap.gov.in>

Link:

<https://apsche.ap.gov.in/Pdf/Guidelines%20for%20the%20CSP%20Internship%20Community%20Service%20Project.pdf>

1. It is mandatory for all the students to complete 2 months (120 hours) of Community Service Project as a part of the 10-month mandatory internship/on the job training.
2. Consider yourself a committed volunteer in the community, you work with.
3. Every student should identify the village/community/habitation for Community Service Project (CSP) in consultation with the College Principal/the authorized person nominated by the Principal.
4. Report to the community/habitation as per the schedule given by the College. You must make your own arrangements for transportation to reach the community/habitation.
5. You will be assigned a Faculty Guide from your College. He/She will be creating a WhatsApp group with your fellow volunteers. Post your daily activity done and/or any difficulty you encounter during the programme.
6. You should maintain punctuality in attending the CSP. Daily attendance is compulsory.
7. You are expected to learn about the community/habitation and their problems.
8. Know the leaders and the officials of the community/habitation.
9. While in the project, always wear your College Identity Card.
10. If your College has a prescribed dress as uniform, wear the uniform daily.
11. Identify at least five learning objectives in consultation with your Faculty Guide. These learning objectives can address:
 - Information about the community, including the realities and

problems of the society.

- Need for creating awareness on socially relevant aspects/programs.
 - Acquiring specific Life Skills.
 - Learning areas of application of knowledge and technologies related to your discipline.
 - Identifying developmental needs of the community/habitation.
12. Practice professional communication skills with team members, and with the leaders and officials of the community. This includes expressing thoughts and ideas effectively through oral, written, and non-verbal communication, and utilizing listening skills.
 13. **Be regular in filling up your Program Book. It shall be filled up in your own handwriting. Add additional sheets wherever necessary.**
 14. At the end of Community Service Project, you shall be evaluated by the person in-charge of the community/habitation to whom you report to.
 15. There shall also be an evaluation at the end of the community service by the Faculty Guide and the Principal.
 16. Do not indulge in any political activities.
 17. Ensure that you do not cause any disturbance to the inhabitants or households during your interaction or collection of data.
 18. Be cordial but not too intimate with the people you come across during your service activities.
 19. You should understand that during this activity, you are the ambassador of your College, and your behavior during the community service programme is of utmost importance.
 20. If you are involved in any discipline related issues, you will be withdrawn from the programme immediately and disciplinary action shall be initiated.
 21. Do not forget to keep up your family pride and prestige of your College.
 22. Remember that you are rendering valuable service to the society and your role in the community development will become part of the history of the community.

Community Service Project Report

Submitted in accordance with the requirement for the degree of.....

Name of the College: *Mrs A.V.N College*

Department: *Computer science (Bsc) [m-pcs]*

Name of the Faculty Guide: *K. Swetha*

Duration of the CSP: *From 26/9/2022 To 5/11/2022*

Name of the Student: *B. Vamsi Krishna*

Programme of Study: *community service project - water pollution*

Year of Study: *2020 - 2023*

Register Number: *720130805097*

Date of Submission:

Student's Declaration

I, B. Vamsi Krishna, a student of C.S.P Program,
Reg. No. 720130805097 of the Department of computers
Mrs. A.V.N College College do hereby declare that I have completed
the mandatory community service from 26/9/22 to 5/11/22 in
isukothata (Name of the Community/Habitation) under the Faculty
Guideship of R. Swetha, (Name of the Faculty Guide), Department
of English Mrs. A.V.N College in College

B. Vamsi Krishna
(Signature and Date)

Endorsements

R. Swetha

Faculty Guide

D. Swathi

Certificate from Official of the Community

This is to certify that Boora Vamsi Krishna (Name of the Community Service Volunteer) Reg. No 920130805097 of M.Y.S. AVN College (Name of the College) underwent community service in isukothota (Name of the Community) from 26/9/22 to 5/11/22. The overall performance of the Community Service Volunteer during his/her community service is found to be good (Satisfactory/Good).

P.B.N. Thera
Word Administration Secretary
Authorized Signatory with Date and Seal

Acknowledgements

It is really matter of pleasure for me to get an opportunity to thank all the persons who contributed directly or indirectly for the successful completion of the project report "WATER POLLUTION" with special reference to Simhadri puram, Visakhapatnam district of Andhra Pradesh.

I wish to express my gratitude to all the members of Simhadri for giving the proper response which has been instrumental in completion of this project.

I am thankful to my mentor

Lecturer in

support and encouragement throughout the tenure of the project. Also, I am very grateful to head of the department of Computer science, and the other faculty members of the computer & department for being a source of support during this project period.

B. Vamsi Krishna

CHAPTER 1: EXECUTIVE SUMMARY

The community service report shall have only a one-page executive summary. It shall include a brief description of the Community and summary of all the activities done by the student in CSP and five or more learning objectives and outcomes.

Simhadripuram , Isakatota located in Visakhapatnam
, Andhra Pradesh

Water pollution is contamination of water sources by substance from drinking, cleaning and other activities. Pollutants include chemicals, trash, bacteria and parasites. All forms of pollution eventually make their way to water.

In my survey I have observed that many of the people are affected with water diseases like diarrhoea, typhoid etc.

To control this situation we have to take some objectives.

The water act 1974 is enacted with the object of prevention and control of pollution in India.

Objectives:-

* identify the way in which human waste water can cause water pollution.

* identify contaminants that are non-chemical pollutants

Outcome:-

* Facility should be increased

* Awareness should be increased

CHAPTER 2: OVERVIEW OF THE COMMUNITY

About the Community/Village/Habitation including historical profile of the community/habitation, community diversity, traditions, ethics and values.

Brief note on Socio-Economic conditions of the Community/Habitation.

Simha dripunam , Isakata , pincode 530022 , hb colony
visakhapatnam , Andhra Pradesh , here house are placed
on mountain .the people are too friendly with each other.

The houses are placed within no place there are
street lights for each line of the area using municipal
water for drinking and other usage .

some people are buying water cans for drinking
purpose . the roads are very clean and clear . some places
are filled with dust and wastage of houses . which is mixed
with drinking water .

some people are using ground water for drinking the
water of this area is not purified . people are suffering
from skin diseases , throat disease & long term diseases .

CHAPTER 3: COMMUNITY SERVICE PART

Description of the Activities undertaken in the Community during the Community Service Project. This part could end by reflecting on what kind of values, life skills, and technical skills the student acquired.

The Activities UNDERTAKEN IN THE COMMUNITY DURING THE COMMUNITY SERVICE PROJECT.

- (1) Survey on solid -economics .
- (2) House hold survey .
- (3) Report writing .
- (4) Awareness created .
- (5) Awareness programme .
- (6) submit the project .
- (7) Report the project .

VALUES LIFE SKILLS , AND TECHNICAL SKILLS:-

1. Team work and problem solving skills.
2. the ability to communicate efficiently with others
3. the collaborative nature of project also Reinforces the social and emotional learning programs.
- 4) people in learning environments have a wider and more diverse social circle.
- 5) those whose learn readily and continuously are better able to pass learn along what they have learned and act.
6. when people learn they gain confidence for trying new thing and stretching themselves

ACTIVITY LOG FOR THE FIRST WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day -1	Few houses are using municipal water	Drinking municipal water	Gr. N. W. J. S. S.
Day -2	many houses getting water from bore	Facilities should be increased	Gr. N. W. J. S. S.
Day -3	Few houses getting water from outside but many people are getting mud water	Awareness should be increased here	Gr. N. W. J. S. S.
Day -4	many people are drinking mineral water due to low water quality	Quality of water should be increased	Gr. N. W. J. S. S.
Day -5	some municipal water is having repellments in water	Facilities should be increased	Gr. N. W. J. S. S.
Day -6	many people are drinking borewater and using it for cooking too	water supply should be increased	Gr. N. W. J. S. S.

WEEKLY REPORT

WEEK - 1 (From Dt..... to Dt.....)

Objective of the Activity Done:

Detailed Report:

in simhadripuram, Hb colony the water supply is too low some people are getting water with mixed water pollutants, pesticides and soil in the water the water is heated for drinking purpose.

people are suffering from joint pains, fevers, colds, cough and some long term diseases. some people are not getting required amount of water for drinking and usage.

in this colony the water quality is low and most of the people are unaware of diseases. they are getting from drinking this type of water. water with bad quality kidney diseases and liver problems are noticed in the people who are above the 60.

ACTIVITY LOG FOR THE SECOND WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	in Hb colony few people are suffering from water diseases	Awareness should be provided	N. Ramu.
Day - 2	Few people are suffering from joint pains and long term diseases	Facilities should be increased	N. Ramu
Day - 3	in Hb colony some people are getting mud water with soil.	water supply should be increased	N. Ramu
Day - 4	in Hb colony people are getting water with mixed pesticides	quality of water should be increased	N. Ramu
Day - 5	some people are drinking bore water due low water supply	water supply should be increased	N. Ramu
Day - 6	many people are not getting water from municipal corporation	supply of water should be increased	N. Ramu

WEEKLY REPORT

WEEK - 2 (From Dt..... to Dt.....)

Objective of the Activity Done:

Detailed Report:

Some people are getting water from outside due to mixing of drinking water with drainage water pollution. They are getting low quality water. Some people are depending on ground water due to low quality of water.

In rainy season people are suffering from fever, joint pains & are drinking water with mud and dust & are suffering from kidney problems.

Finally there is no proper water supply quality of water is low people are unaware of diseases they are getting. Some people are not using municipal water and they are depending on ground water for drinking.

70% percent of people working so they are not getting water from municipal corporation & getting water from outside for drinking. They are getting mineral water.

ACTIVITY LOG FOR THE THIRD WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	many houses holdens are suffering from joint pains and long term diseases	quality should be increased	m. Ramu
Day - 2	few people are drinking bore water and using jerrycan	awareness should be created in people.	m. Ramu
Day - 3	in the colony people are getting water with mixed pesticides	unaware of the problems from the water.	m. Ramu
Day - 4	many people drinking water with mixed bleaching powder	quality of mixed bleaching powder should be decreased	m. Ramu
Day - 5	most of the people are getting water from outside due to water quality.	quality of water should be increased	m. Ramu
Day - 6	few people are drinking bore water and some suffering from joint pains	water supply should be increased	m. Ramu

WEEKLY REPORT

WEEK - 3 (From Dt..... to Dt.....)

Objective of the Activity Done:

Detailed Report:

Agricultural medical and factories waste is mixed with local drinking water because of this they are getting water from outside like mineral water etc. water quality is also very low.

In simple words people are getting water with mixed bleaching powder with in high quantity. Due to this some people are getting long term diseases, fever, cold, liver problems kidney problems etc.

In Simhadripuram, HB Colony, people are unaware of diseases they are getting quality of water is too low. The water supply is low and people with large family are not getting required amount of water. People are buying water cans from outside and is with high amount.

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	Most of the people are getting mineral water in Hb colony	People in Hb colony using mineral water to drink	J. Divya
Day - 2	Few people are drinking municipal water in their areas	facilities should be created	J. Divya
Day - 3	Some people are drinking under ground water & using it for cooking purpose	Awareness should be created in Hb colony	J. Divya
Day - 4	Few people are affordable to get filtered water	People are in Hb colony using filter	J. Divya
Day - 5	in Hb colony they are drinking polluted water.	Some people are suffering with diseases due to drinking of polluted	J. Divya
Day - 6	some peoples are affordable to get filtered water	People are affordable to drink municipal water.	J. Divya

WEEKLY REPORT

WEEK - 4 (From Dt..... to Dt.....)

Objective of the Activity Done:

Detailed Report:

in sim hadhipuram hb colony people are drinking municipal water some people are drinking mineral water and few people are drinking water by heating.

they are not getting proper drinking water. polluted were mixed with the drinking water. some people are getting water with mud particles which is not used for drinking but for normal usage.

water supply is not supplied properly in required amount of time people are suffering with some skin diseases, throat diseases and some long term diseases

people are not aware of diseases they are getting from drinking the polluted water

ACTIVITY LOG FOR THE FIFTH WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day -1	most of the people are drinking municipal water and suffering joint pains	in Hb colony awareness should be created	T. mandu
Day -2	many people are getting low water supply and getting water from outside	water supply should be increased	T. mandu
Day -3	most of the people are drinking mineral water and having good water facilities	water supply should be increased	T. mandu
Day -4	many people are getting municipal water with high mixed bleaching powder	people unaware of diseases they are getting	T. mandu
Day -5	Few people drinking bore water and using it for looking too	Awareness should be created	T. mandu
Day -6	People getting joint pains and some long term diseases due to low water quality	awareness should be created and quality of water should be increased	T. mandu

WEEKLY REPORT

WEEK - 5 (From Dt..... to Dt.....)

Objective of the Activity Done:

Detailed Report:

in simhadripuram, Hb colony they are not using municipal water and they are getting water from outside like bore water mineral water and some quality water.

The quality of water is not good. Some pollutants are mixed drinking water, it is also inferred that some residential areas NAD Junction Bichenajapalem including a couple of slum area like poonam market area contains aquifers with high degree of hydrologic vulnerability.

most of the sections of the Hb colony and other residential area in the study area have a high degree of vulnerability in the range 120% on plastic < 160. Due to this people are getting some health diseases.

CHAPTER 5: OUTCOMES DESCRIPTION

Details of the Socio-Economic Survey of the Village/Habitation Attach the questionnaire prepared for the survey.

1. Name of the person?
2. Name of the village (or) town?
3. Gender and age of the person.
4. Type of family (nuclear / Joint / extended)?
5. What is your door number.
6. Which sources of drinking water are available in your neighbourhood.
7. Which sources does your household use?
8. Is there frequency sufficient for your needs?
9. Any water born diseases in your house?
10. Is any of your family members suffering from joint pains?
11. Name of the medicine frequently used in family?
12. Quality and drinking water source.
13. How is drinking water purified.
14. What impact do humans have on the aquatic life?
15. Water born diseases encountered in the last few years?

Describe the problems you have identified in the community

Contaminated water and poor sanitation are linked to transmission of diseases such as cholera, diarrhoea, dysentery, hepatitis typhoid and polio. Absent, inadequate or inappropriately managed water and sanitation services expose individuals to preventable health risks. This is particularly the case in health care facilities where both patients and staff are placed at additional risks of infection and diseases when water, sanitation and hygiene services are lacking. Globally 15% of people develop an infection during a hospital stay with the proportion much greater in low income countries.

Inadequate management of urban industrial and agricultural waste water means the drinking water of hundreds of millions of people is dangerously contaminated or chemically polluted. Natural presence of chemical particularly in ground water, can also be of health significance including arsenic and fluoride. While other chemical such as lead may be elevated in drinking water as a result of leaching from water supply components in contact with drinking water.

Short-term and long-term action plan for possible solutions for the problems identified and that could be recommended to the concerned authorities for implementation.

possible solution for the problem unidentified

- > waste water treatment.
- > plastic waste reduction.
- > water conservation
- > install a water efficient toilet in your home.
- > specific tanks.
- > Avoid using the toilet as a waste basket
- > storm water management.
- > green agriculture.

Solutions:-

=> Before raw sewage can be safely released back into the environment it needs to be treated correctly in a water treatment plant sewage goes through a number of chambers and chemical processes to reduce the amount and toxicity of the water.

=> the final stage of treatment is the tertiary phases this stage must be done before the water can be reused Almost all solid particles are removed from the water and chemical are removed additives are supplied to get any left overs.

Description of the Community awareness programme/s conducted w.r.t the problems and their outcomes.

Awareness about water.

Public water conservation campaigns raise awareness in all levels of society about the importance of saving water to cope the with its scarcity and ensure sustainability. The aim is to change citizen attitude and behaviour to improve water use efficiency awareness programmes.

S.No	Name of program	mode	Date
1.	Awareness of program on water conservation	prajavani news paper, phone in programme	29-05-2019
2.	community based water resource management	knishidharshana (chandan vahini) phone in program	23-06-2020
3.	on occasion of world water day Julada moolya Jagada Kantvaya	Knishidharshana (chandan vahini) phone in programme	22-03-2021

Report of the mini-project work done in the related subject w.r.t the habitation/village.

A mini-project work in the related subject w.r.t the habitation/village. (For ex., a student of Botany may do a project on Organic Farming or Horticulture or usage of biofertilizers or biopesticides or effect of the inorganic pesticides, etc. A student of Zoology may do a project on Aquaculture practices or animal husbandry or poultry or health and hygiene or Blood group analysis or survey on the Hypertension or survey on the prevalence of diabetes, etc.

The Report shall be limited to 8-10 pages.

Water pollution:-

Water pollution (or aquatic pollution) is the contamination of water bodies usually as a result of human activities so that it negatively affects its uses. Water bodies include lakes, rivers, oceans, aquifers, reservoirs and ground water. Water pollution results when contaminants are introduced into these water bodies. Pollution can be attributed to one of four sources: sewage discharge, industrial activities, agricultural activities and urban runoff including storm water. It can be grouped into surface water pollution or ground water pollution. For example, releasing inadequately treated wastewater into natural waters can lead to degradation of these aquatic ecosystems. Water pollution can also lead to water-borne diseases for people using polluted water for drinking, bathing, washing or the irrigation. Water pollution reduces the ability of the body of water to provide ecosystem services (such as drinking water) that it would otherwise provide.

Sources of water pollution are either point sources (a)

non-point sources have one identifiable cause, such as a stream drain a wash water treatment plant (a) or air spill. Non-point source are more diffuse such as agriculture runoff pollution is the result of the cumulative effect over time pollution may take the form of toxic substance (eg, oil, metals, plastics, pesticides, persistent, organic pollutants, industrial waste products) stressful conditions (eg, changes of pH, hypoxia or anoxia, increased temperature: excessive turbidity, unpleasant taste or odour, and change of salinity) on pathogenic organisms, contaminants may include organic and inorganic substance that can also be a pollutant and this is called thermal pollution. A common cause of the thermal pollution is the use of water as a coolant by power plants and industrial manufactures of it.

Control of water pollution requires appropriate infrastructure and management plans as well as legislation. Technology solutions can include improving sanitation, sewage treatment, industrial waste water treatment, agriculture waste water treatment, erosion control, sediment control and control of

Urban runoff (including stormwater management) effective control of urban runoff includes reducing speed and quality of flow.

CONTAMINANTS WITH AN ORIGIN IN SEWAGE :-

The following compounds can all reach water bodies

via raw sewage or even treated sewage discharges.

- Various chemical compounds found in personal hygiene and cosmetic products.
 - Disinfection by products found in chemically disinfected by products water (while these are the chemicals can be a pollutants in the water distribution ~~raw~~ network they are fairly volatile and therefore not usually found in environment waters)
 - Hormones and synthetic materials such as the phthalates that mimic hormones in their action.
 - Insecticides and herbicides often from agricultural runoff
- if the water pollution stems from sewage the main pollutants are, suspended solids biodegradable organic matter, nutrients and the pathogenic organisms.

ORGANIC compounds :-

Organic substances that enter water bodies are often toxic .

- petroleum hydrocarbons , including fuels (gasoline diesel fuel, jet fuels and fuels oils) and lubricant by product, from oil spills on storm water runoff.
- Volatile organic compounds such as improperly stored industrial solvents, problematic species are organochlorides such as polychlorinated biphenyl (PCBs) and trichloroethylene. a common solvent per- and polyfluoroalkyl substance (PFAS), are persistent organic pollutants.

types of surface water pollution:-

Surface water pollution includes pollutions of rivers, lakes and oceans. A subset of surface water pollutions is marine pollutions which affects the oceans. Nutrient pollution refers to contamination by excessive inputs of nutrients.

globally about 4.5 billion people do not have safely managed sanitation of 2017 according to an estimate by the joint sanitation programme for water supply and the sanitation.

MARINE POLLUTION:-

Marine pollution occurs when substances used or spread by humans, such as industrial effluents, agricultural and residential wastes, particles, noise, excess carbon dioxide or invasive organisms enter the ocean and cause harmful effects there.

NUTRIENT POLLUTION:-

Nutrient pollution is a form of water pollution that refers to contamination by excessive inputs of nutrients.

THERMAL POLLUTION:-

Thermal pollution, sometimes called thermal enrichment, is the degradation of water quality by any process that changes ambient water temperature. Thermal pollution is the rise or fall in the temperature of a natural body of water caused by human influence.

BIOLOGICAL POLLUTION:-

The introduction of aquatic invasive organisms is a form of water pollution as well. It is caused by human influence biological pollution.

Impacts:-

→ Ecosystems:-

Water pollution is a major global environmental problem because it can result in the degradation of all aquatic ecosystems fresh, coastal and ocean waters.

→ Public HEALTH AND WATER BORN DISEASES:-

polluted water spread gastrointestinal diseases and parasitic infections and killed 1.8 million people these are also referred to as water borne diseases.

→ OCEAN ACIDIFICATION:-

Ocean acidification is another impact of water pollution. Ocean acidification is the ongoing decrease in the pH value of the further oceans caused by the uptake of carbon dioxide.

→ GROUND WATER POLLUTION:-

Groundwater pollution occurs when pollutants are released to the ground and make their way into ground water. This type of water pollution can also occur naturally due to the presence of a mineral and unwanted constituent, content or impurity in the ground water in which case it is more likely

referred to as contamination rather than pollution

When these groundwaters supplied to people they get diseases like cholera, diarrhea, Joint pains, Kidney problems, liver diseases, and blood diseases, skin allergies

Ground water pollution poses a hazard to the well being of people and ecosystems. One quarter of the world's population depends on groundwater for drinking

These polluted water can be tested in many ways the following diagram represent the water pollution test.

CHAPTER 6: RECOMMENDATIONS AND CONCLUSIONS OF THE MINI PROJECT

RECOMMENDATIONS:-

- Small water enterprises (swes) :- employ kiosks to complement piped water supply
- piped water supply :- pilot 24/7 water supply initiative and build local capacity.
- Digital Tools: improve e.governance for villages leveraging digital tools.

CONCLUSIONS:-

- only a few of which are discussed here rivers and streams demonstrate some capacity to recover from the effects of certain pollutants, but lakes, bays, ponds, sluggish rivers, and oceans have little resistance to the effects of water pollution.
- there is need to identify a water conservation and demand strategy for entire municipality.
 - there is need for research and development in potential water use saving facilities and appropriate technologies.

Student Self-Evaluation for the Community Service Project

Student Name: B. Vamsi Krishna

Registration No: 1720130805097

Period of CSP: From: To:

Date of Evaluation:

Please rate your performance in the following areas:

Rating Scale: Letter grade of CGPA calculation to be provided

1	Oral communication	1	2	3	4	5
2	Written communication	1	2	3	4	5
3	Proactiveness	1	2	3	4	5
4	Interaction ability with community	1	2	3	4	5
5	Positive Attitude	1	2	3	4	5
6	Self-confidence	1	2	3	4	5
7	Ability to learn	1	2	3	4	5
8	Work Plan and organization	1	2	3	4	5
9	Professionalism	1	2	3	4	5
10	Creativity	1	2	3	4	5
11	Quality of work done	1	2	3	4	5
12	Time Management	1	2	3	4	5
13	Understanding the Community	1	2	3	4	5
14	Achievement of Desired Outcomes	1	2	3	4	5
15	OVERALL PERFORMANCE	1	2	3	4	5

Date:

Signature of the Student

Evaluation by the Person in-charge in the Community/Habitation

Student Name: **B. Vamsi Krishna**
Registration No: **720130805097**
Period of CSP: From: To:
Date of Evaluation:
Name of the Person in-charge:
Address with mobile number:

Please rate the student's performance in the following areas:

Please note that your evaluation shall be done independent of the Student's self-evaluation

Rating Scale: 1 is lowest and 5 is highest rank

1	Oral communication	1	2	3	4	5
2	Written communication	1	2	3	4	5
3	Proactiveness	1	2	3	4	5
4	Interaction ability with community	1	2	3	4	5
5	Positive Attitude	1	2	3	4	5
6	Self-confidence	1	2	3	4	5
7	Ability to learn	1	2	3	4	5
8	Work Plan and organization	1	2	3	4	5
9	Professionalism	1	2	3	4	5

Internal Evaluation for the Community Service Project

Objectives:

- To facilitate an understanding of the issues that confront the vulnerable / marginalized sections of society.
- To initiate team processes with the student groups for societal change.
- To provide students an opportunity to familiarize themselves with the urban / rural community they live in.
- To enable students to engage in the development of the community.
- To plan activities based on the focused groups.
- To know the ways of transforming society through systematic programme implementation.

Assessment Model:

- There shall only be internal evaluation.
- The Faculty Guide assigned is in-charge of the learning activities of the students and for the comprehensive and continuous assessment of the students.
- The assessment is to be conducted for 100 marks.
- The number of credits assigned is 4. Later the marks shall be converted into grades and grade points to include finally in the SGPA and CGPA.
- The weightings shall be:

○ Activity Log	20 marks
○ Community Service Project Implementation	30 marks
○ Mini Project Work	25 marks
○ Oral Presentation	25 marks
- Activity Log is the record of the day-to-day activities. The Activity Log is assessed on an individual basis, thus allowing for individual members within groups to be assessed this way. The assessment will take into consideration the individual student's involvement in the assigned work.
- While evaluating the student's Activity Log, the following shall be considered -
 - a. The individual student's effort and commitment.
 - b. The originality and quality of the work produced by the individual student.
 - c. The student's integration and co-operation with the work assigned.
 - d. The completeness of the Activity Log.
- The assessment for the Community Service Project implementation shall include the following components and based on Weekly Reports and

Outcomes Description

- a. Details of the Socio-Economic Survey of the village/habitation.
- b. Problems identified.
- c. Community Awareness Programs organized.
- e. Suggested Short-Term and Long-Term Action Plan.

INTERNAL ASSESSMENT STATEMENT

Name Of the Student: *Boora Vamsi Hrishna*
