Community Service Project

AP STATE COUNCIL OF HIGHER  
EDUCATION  
(A STATUTORY BODY OF GOVERNMENT OF ANDHRA PRADESH)

## Program Book for Community Service Project

Name of the Student: Wajahat Ali

Name of the College: Mrs. A V N College

Registration Number: 720130205192

Period of CSP: From: 13-08-22 To: 16-09-22.

Name & Address of the Community/Habitation:

Venkojipalem, Visakhapatnam.

## Community Service Project Report

*Submitted in accordance with the requirement for the degree of .....*

Name of the College: Mrs. AVN College

Department: BSc (Statistics)

Name of the Faculty Guide: Ch. Mallika

Duration of the CSP: From 13/01/2022 to 16/09/22

Name of the Student: MD Wajahat -Ali

Programme of Study - Health and hygiene

Year of Study: 2020 - 2023

Register Number: 20130805192.

Date of Submission:

**Student's Declaration**

I, Mr. Wajid Ali, a student of Community Program, Reg. No. 720180106192 of the Department of Statistics, Mys. A.V.N. College do hereby declare that I have completed the mandatory community service from 13/08/22 to 16/09/22 in Venkyipalem.. (Name of the Community/Habitation) under the Faculty Guidship of Ch. Mallika (Name of the Faculty Guide), Department of Statistics in Mys. A.V.N. College  
& mathematics

(Signature and Date)

**Endorsements**Faculty Guide Ch. Mallika

Head of the Department

Principal

**Certificate from Official of the Community**

This is to certify that MD. Mojibul Ali (Name of the Community Service Volunteer) Reg. No. 710130609192 of MVA. College (Name of the College) underwent community service in Venkejipalem (Name of the Community) from 13/08/22 to 16/09/22.

The overall performance of the Community Service Volunteer during his/her community service is found to be Good (Satisfactory/Good).

Authorized Signatory with Date and Seal

## ACKNOWLEDGEMENTS

It is really a matter of pleasure for me to get an opportunity to thank all the persons who contributed directly or indirectly for the successful completion of the project report, "A study on Health and Hygiene in the community" with special reference to Health in Reference to old dairy farm —, Visakhapatnam District of A.P.

I wish to express my gratitude to all the members of old dairy farm for giving the proper responses, which has been instrumental in completion of this project. I am thankful to our principle

of Mrs. AVN college and my mentor Dr. Mallika Msc Mphil Phd. Lecturer in mathematics through out the tenure of the project. Also I am very grateful to S. Shankar, Department of mathematics and P. Gandhi

HOD in Department of mathematics & statistics and other faculty members for being a source of support during this project period.

Bsc : Statistics

CHAPTER 1: EXECUTIVE SUMMARY

The community service report shall have only a one-page executive summary. It shall include a brief description of the Community and summary of all the activities done by the student in CSP and five or more learning objectives and outcomes.

Community projects help in holding interests and talents of students. It builds approaches to learning skills. It provides a more low stakes 'practical' skills and organization to prepare for the required personal project. Coordinators can use data from the community project to determine areas for programme improvement. And also this community projects can expand the opportunities for youth to acquire personal and social assets and to experience the broad range of features of positive development settings.

I conducted a survey in the community to know about their problems facing on their surroundings. Survey covered almost all the questions like about their health issues, cleanliness in their area, what kind of food they are eating to be healthy. And those questions are prepared from various topics.

## CHAPTER 2: OVERVIEW OF THE COMMUNITY

- About the Community/Village/Habitation including historical profile of the community/habitation, community diversity, traditions, ethics and values.
- Brief note on Socio-Economic conditions of the Community/Habitation.

Ravindra nagar is a neighborhood situated on the northern part of Visakhapatnam city, India. The area, which falls under the local administrative limits of greater Visakhapatnam municipal corporation is about 7km from the Dwaraka nagar which is city centre. Sundarnagar is located near to Chilva and surrounded by kambalakonda wild life sanctuary. An old dairy farm Visakhapatnam Sundarnagar is well connected with one town. Sundarnagar / Ravindranagar is well connected to most locations of the city by the state-owned bus service, APSRTC. As Bus Rapid Transit System. roads. Sundarnagar is directly connected to Simbachalam, Jagadamba center, MVP colony. The Ravindra Nagar area runs from Ravindra Nagar last stop and ends at old head post office. There are many hospitals are being built in around in Sundar Nagar like Charva hospital runs etc....

CHAPTER 3: COMMUNITY SERVICE PART

Description of the Activities undertaken in the Community during the Community Service Project. This part could end by reflecting on what kind of values, life skills, and technical skills the student acquired.

Through this community service part, I had a positive impact on my academic learning, improved my ability to apply what I have learned in the real world. I had positive impact on academic outcomes such as demonstrated complexity understanding, ~~problem~~ problem analysis, ~~problem solving~~ problem solving, critical thinking, ~~problem~~ and cognitive development.

Due to this project, I had greater sense of personal efficiency, personal identity, spiritual growth and moral development, particularly the ability to work well with others and build leadership, reduced stereotypes and greater inter cultural understanding and citizenship, skills after graduation and greater academic learning. It improved social responsibility.

This community service part through an effective thought in different aspects in an particular community.

## ACTIVITY LOG FOR THE FIRST WEEK

DAY & DATE	BRIEF DESCRIPTION OF THE DAILY ACTIVITY	LEARNING OUTCOME	Person In-charge Signature
Day - 1	we learned about the health and hygiene with the help of some books and internet. we gathered some information regarding our topic	we came to know about how health and hygiene plays a crucial role in our human life	
Day - 2	We prepared a questionnaire about health and hygiene and we selected a particular area for survey	Based on gathered information we came to know what type of questions should be asked	
Day - 3	With the help of questionnaire we conducted a survey in the field/area we have chosen for project		
Day - 4	With the help of questionnaires we conducted a survey in the field/area we have chosen for project		
Day - 5	With the help of questionnaires we conducted a survey in the field/area we have chosen for project		
Day - 6	With the help of questionnaires we conducted a survey the field/area we have completed of our project		

## CHAPTER 5: OUTCOMES DESCRIPTION

Details of the Socio-Economic Survey of the Village/Habitation. Attach the questionnaire prepared for the survey.

QUESTIONNAIRE	
Personal Details :-	
Name of the person :

WEEKLY REPORT

WEEK - 1 (From Dt..... to Dt.....)

Objective of the Activity Done:

Detailed Report:

I have abstracted this information from the Community (Surbhanga, old being from Varkhapatnam). In this report I was noticed that here people are having so many health issues, and not maintaining a healthy diet. They are not aware of nutritious food. In that Community we conducted survey for specified people like old aged people. One day in that survey we came to know that they all are having healthy diet and taking prescribed medicines for their health conditions. As well as we observed their availabilities for their daily needs by using the questionnaire which was prepared by the gathered information, we went to the houses and asked questions to the individual's of the house. which gave us an over view on health issues which they are facing. And also about the no. of availabilities in the Community which makes their life little better.

ACTIVITY LOG FOR THE SECOND WEEK

DAY & DATE	BRIEF DESCRIPTION OF THE DAILY ACTIVITY	LEARNING OUTCOME	Person In-charge Signature
Day - 1	With the help of question -naire we conducted a survey in the field/area as we chosen for our project	we came to know what are the problems in area.	
Day - 2	With the help of question -naire we conducted a survey in the field/area where we have chosen for the completion for our project.	from the survey we came to know their availabilities in their area.	
Day - 3	With the help of question -naire we conducted a survey in the field/area where we have choose for the community service project.	we understand some of the issues about their health of people in the area.	
Day - 4	with the help of question -naire we conducted a survey in the field/area where we have chosen for the community service project.	we came to know about their availabilities in their area.	
Day - 5	with the help of question -naire we conducted a survey in the field/area where we have chosen for the community service project.	we came to understand some of the issues about their health of people.	
Day - 6	with the help of question -naire we conducted a survey in the field/area where we have chosen for the community service project.	we told some of precautions and measures for their health issues.	

WEEKLY REPORT

WEEK - 2 (From Dt..... to Dt.....)

Objective of the Activity Done:

Detailed Report:

We have gathered so much information from the Selected Community (Sundaravaram, Old Jaiyy farm). From the Survey we noticed that the people in the Community are facing so many problems. Health plays a crucial role in everyone's life. In that Community we conducted Survey for specified people like children from 8-15 yrs. aged. We gave some information to them. And the children told that they are having their mid-day-meal in their schools. That which is one part which makes students healthy. The food items which are provided in the mid-day meal program gives vitamins, minerals, fats to the children's body. But also they are having so many health problems like fever, lack of cleanliness. Due to their surroundings lack of cleanliness leads to the health issues. of the children. we created an awareness on children health problems to their parents to take care of their food and medication we also provided some pamphlet about healthy life. And medicines for some daily routine medicines.

## ACTIVITY LOG FOR THE THIRD WEEK

DAY & DATE	BRIEF DESCRIPTION OF THE DAILY ACTIVITY	LEARNING OUTCOME	Person In-charge Signature
Day - 1	With the help of questionnaire we conducted a survey in the field/area as we choose for our project.	From the survey, we came to know what are the problems in area.	
Day - 2	With the help of questionnaire we conducted a survey in the field/area as we chosen for our project.	From the survey, we came to know their availabilities in their area.	
Day - 3	With the help of questionnaire we conducted a survey in the field/area as we chosen for our project.	we understand some of the issues about their health of people in the area.	
Day - 4	With the help of questionnaire we conducted a survey in the field/area as we chosen for our project.	we came to know about their availabilities in their area.	
Day - 5	With the help of questionnaire we conducted a survey in the field/area as we chosen for our project.	we came to understand some of the issues about their health of people	
Day - 6	With the help of questionnaire we conducted a survey in the field/area as we chosen for our project.	we told some of precautions and measures for their health issues.	

WEEKLY REPORT

WEEK - 3 (From Dt..... to Dt.....)

**Objective of the Activity Done:**

**Detailed Report:**

We have acquired their information from the selected Community (Sudabnagar, old Dary from, Visakhapatnam). In this report i was noticed that here people are having health issues And not leading healthy life. we prepared a questionnaire to identify the problems. we conducted Survey for middle aged people in that area. we asked them So many questions about their health, and food habits of their daily life. And also the hygienic ways they follow to lead a clean and good life. we conducted an awareness Campaign with Effective plack Cards with attractive Drawings and Slogans. And we gave Suggestion to their all health problems. And we told them to maintain proper diet to be healthy. Therefore. you will not get Sick and do there work without any issues Completely we gave some hand written papers with personal measures and rules as well as diet measures to the middle aged people. They were very happy after listening all these and praised us for taking part

ACTIVITY LOG FOR THE FOURTH WEEK

DAY & DATE	BRIEF DESCRIPTION OF THE DAILY ACTIVITY	LEARNING OUTCOME	Person In-charge Signature
Day - 1	After conducting 3 weeks of survey we gathered all the outcomes of the people.	we came to know the outcomes of the survey.	
Day - 2	According to the outcomes we conducted and prepared pluck-cards on health and hygiene.	we came to create some awareness.	
Day - 3	on the 3rd day we conducted a campaign with those pluck cards to aware people.	we came to aware people by using diagrams.	
Day - 4	Next day, also we conducted some other areas campaign and created an awareness.	we came to aware those people with the slogans.	
Day - 5	With all our team members of our project participated in the campaign program and took pictures.	we came to create some awareness in the area.	
Day - 6	After the campaign we conducted awareness program in that area addressing some problems.	we finally created the solutions of the problems.	

## WEEKLY REPORT

WEEK - 4 (From Dt..... to Dt.....)

Objective of the Activity Done:

Detailed Report:

In week-4 we all team members of Community project conducted an awareness campaign. We started preparing placard cards using cardboard and sketches. Our idea is to create awareness in people in an effective way. So, we gathered all the placard cards and went to the community and started campaigning there with different slogans. Our campaign will influence people by encouraging them to adopt simple healthy habits that can prevent diseases. Our India govt. has also launched a program called "Swachh Bharath" to keep our India clean and green which helps to lead good and peaceful life. And we took a particular topic dedicating an entire day to health issue and help create greater awareness about the causes, symptoms, effects and potential treatments available. And we went to each house to awaren about all the things which they are facing. we discussed about the problems about their surroundings and also we suggested them to what to do to clean their small surrounding issues. They took an initiative on the day we felt very happy.

## ACTIVITY LOG FOR THE FIFTH WEEK

DAY & DATE	BRIEF DESCRIPTION OF THE DAILY ACTIVITY	LEARNING OUTCOME	Person In-charge Signature
Day - 1	on the first day of 5th week we conducted an awareness campaign on some of the problems.	we came to know that so many people are not aware.	
Day - 2	we created an overview about what to do and not to do to lead healthy life.	we came to know that the overall thing about the topic.	
Day - 3	we conducted an awareness program to clear all the doubts what they have about health.	we came to know about the clear picture of health & hygiene.	
Day - 4	we conducted awareness program about children health and their growth.	we created an awareness about the topic.	
Day - 5	we prepared an ppt about health & hygiene to create much awareness visually.	we created an visual picture about the respective topic.	
Day - 6	on last day, we presented the ppt on behalf of the people in the area.	we finally had created an fulfilled goal matters over the topic.	

WEEKLY REPORT

WEEK - 5 (From Dt..... to Dt.....)

Objective of the Activity Done:

Detailed Report:

Awareness - raising is a process that seeks to inform and educate people about a topic or issue with the intention of influencing their attitudes, behaviours and beliefs towards the achievement of a defined purpose or goal. It can mobilize the power of public opinion in support of an issue. In that awareness campaign we used audio-visual materials such as ppt video, and small video screen for an effective awareness on the people. And we conducted discussions with ward members of the community and also along with the community members. We gave them some newspapers, and articles which have important information about health and hygiene. The people in the area are got excited after watching the ppt video which was done by our students to be an crucial part of improving their locality. We also discussed with the higher officials of the respective problems facing in their area. We requested them to take care of the problems and try to solve as early as possible. They responded very quickly and promised us that they will solve problems.

Describe the problems you have identified in the community

From the survey in the community I observed so many problems, which they are facing among many days. In the area first thing I observed is health care problems. And there is a shortage of water because there are no proper water pipe lines in the community. In particular place in the area I identified open drainage there which causes so many health issues to the area people in the locality. And also they are facing mosquitoes problem in the evening time leads to dengue, malaria fever which is very harmful and decreases the platelets in the body. Near the community there are some small factory type godowns there which releases waste gases. All the people are using lots of plastic materials, No one is aware of what will happen with the over usage of plastic, Because most of the people in the locality are illiterates all they all are daily labourers. In that area I also identified the roads are also not good, there are some holes on the roads which causes so many accidents, But they are not taking any initiative for the development of their surroundings.

Short-term and long term action plan for possible solutions for the problems identified and that could be recommended to the concerned authorities for implementation.

By using the gathered information from the survey these are so many problems they all facing in their daily life for the problems these are some short term as well as long term action plans

The short term solutions all in the hands of the individual person are in the hands of the individual person for water shortage the solution is construct dams near the area water conservation are reuse and also storing of water in can & drums for daily usage

Another major issue is mosquitoes in the evening time and the solution for this problem is using screen on windows and doors, Repairing the drainage holes and also by stopping mosquitoes bite from laying eggs in or near water

by these solutions we can reduce spreadable diseases like malaria, Dengue etc. The most important problem is using plastic by replacing plastic tupperware for glass & steel containers, by avoiding using of plastic bags and straws

By the above short-term solutions all the problems can be controlled temporarily means for some of the days or months

Description of the Community awareness programme/s conducted w.r.t the problems and their outcomes.

By using the gathered information from the Survey there are so many problems they are facing in their daily life. For the problems there are some short-term as well as long-term action plans. The short-term solutions are in the hands of the individual person. For water shortage the solution is construct dams near the area, water conservation and reuse. And also storing of water in cans and drums for daily usage. Another major issue is mosquitoes in the evening time and the solution for this problem is using screens on windows and doors, repairing the drainage, lakes and also by stopping mosquitoes from laying eggs in or near water, by these solutions we can reduce reproducible diseases like malaria, Dengue etc. The most important problem is using of plastic which leads to dangerous health issues. And the measure for control of using plastic by replacing plastic tupperware for glass or steel containers by avoiding using of plastic bags and straws. By the above short-term solutions all the problems can be controlled.

**Report of the mini-project work done in the related subject w.r.t the habitation/village.**

A mini-project work in the related subject w.r.t the habitation/village. (For ex., a student of Botany may do a project on Organic Farming or Horticulture or usage of biofertilizers or biopesticides or effect of the inorganic pesticides, etc. A student of Zoology may do a project on Aquaculture practices or animal husbandry or poultry or health and hygiene or Blood group analysis or survey on the Hypertension or survey on the prevalence of diabetes, etc.)

The Report shall be limited to 6 pages.

## ABSTRACT :-

### Introduction :-

According to the world health organization health is defined as "a state of complete physical, social and mental well-being and not merely the absence of disease or infirmity".

And "Hygiene refers to conditions and practices that help to maintain health and prevent the spread of diseases".

Good health is more important than being free from disease. Healthy people are more efficient, productive and live longer than unfit people. Important factors that contribute to good health and hygiene are: Balanced diet, personal hygiene.

Everyday, we eat a variety of meals. Food is required by all living creatures. Plants and animals both require nourishment in order to flourish.

plants produce their own food, whereas animals rely on the sustenance of others. we all start the day with a healthy breakfast and then eat at least two additional large meals - lunch and dinner.

The food components are of five categories are carbohydrates, fats, vitamins, proteins, minerals. As like health, hygiene is also an very much important factor which keeps a healthy person. There are so many types hygiene home hygiene, home hygiene, respiratory hygiene, laundry hygiene, medical hygiene at home sleep hygiene, food hygiene. Some factors affecting health are due to individual choices, such as whether to engage in a high-risk behaviour while others are due to structural causes, such as whether the society is arranged in a way that makes it easier or harder for people to get necessary health care services. Still, other factors are beyond both individual and group choices such as genetic disorders.

AIM:- The aim and objective was to study the health status of school going children and to establish the relationship of education, hygiene and sanitation with the general health. Awareness about health and hygiene of people.

MATERIALS AND METHODS:- The present observational study was carried out in Visakhapatnam district of old Dairy farm region of Andhra Pradesh, India. To record the health status of local people from randomly selected area. The collected numerical data was statistically analysed in the form of Pie charts and bar diagrams.

RESULTS:- The present survey was carried out during the year 2022 in old Dairy farm, Visakhapatnam district, covering 120 people to understand about health and hygiene. The majority of people don't know about hygiene and good health. They don't know what type of food should be taken for healthy body. Some of the people follow healthy diet and maintaining regular exercise for proper health.

CONCLUSION :- The present study yielded information basically on health across the population and also about the hygiene how it will be helpful to lead a good and healthy life.

## HISTORY

In 1948, in a radical departure from previous definitions, the world health organization (WHO) proposed a definition that aimed higher, linking health to well-being in terms of "physical, mental, and social well-being and not merely the absence of disease and infirmity". An important implication of this definition is that mental health is more than just the absence of mental disorders & disabilities. Hippocrates is considered to be the father of modern medicine because in his books, which are more than 70. He described in a scientific manner, many diseases and their treatment after detailed observation. He lived about 2400 years ago.

The first modern, pharmaceutical medicine morphine was invented in 1804 by Friedrich Serturner, a German Scientist, he extracted the main active chemical from opium in his laboratory and named it morphine, after the Greek god of sleep.

21  
The American Social Hygiene Association partnered with the government during world war I. The American Social Hygiene Association provided social hygiene health and sexual health information to the soldiers in hopes that this education would help take fewer soldiers out of action from venereal diseases. Systematic activities to prevent or cure health problems and promote good health in humans are undertaken by health care providers.

In the first decade of the 21<sup>st</sup> century, the conceptualization of health as an ability opened the door for self-assessments to become the main indicators to judge the performance of efforts aimed at improving human health. It also created the opportunity for every person to feel healthy, even in the presence of multiple chronic diseases or a terminal condition, and for the re-examination of determinants of health.

Some of the health issues are cancer, diabetes, tuberculosis, malaria, infections, chronic diseases, bone fractures, burns, malnutrition, AIDS etc. ....

Hygiene is a series of practices performed to preserve health. According to the WHO: hygiene refers to conditions and practices that help to maintain health and prevent the spread of disease. The word hygiene from the French word in the manufacturing of food, pharmaceutical, cosmetic and other products, good hygiene is a critical component of quality assurance. Bathing culture in Chinese literature can be traced back to the Shang dynasty (1600-1046 BCE) where bronze inscriptions describe people washing their hair and body in a bath, suggesting people paid attention to personal hygiene. The earliest written account of elaborate codes of hygiene can be found in several Hindu texts, such as the Manusmriti and the Varaha Purana. Contemporary Ayurveda stresses a sattvic diet and good digestion and excretion. Hygiene measures include oil pulling, and tongue scraping. Detoxification also plays an important role.

Hygiene activities can be grouped into the following: Home and Everyday hygiene, personal hygiene, medical hygiene, Sleep hygiene and food hygiene. Hygiene practices vary from one culture to another.

②

## CHAPTER 6: RECOMMENDATIONS AND CONCLUSIONS OF THE MINI PROJECT

Cleanliness is not the responsibility of only one person however; it is the responsibility of each and every person living in the home, city and country. Good health and good personal hygiene is one of the best ways to protect yourself from getting illnesses such as gastroenteritis and common cold. And it is important for maintaining both physical and mental health.

From this project we create an awareness about health and hygiene in people in different sectors. In the study participants were aware about personal cleanliness and healthy food will keep them healthy and strong. If the children maintain a good diet then they maintain regular attendance in school. Maintaining good personal hygiene will also help prevent you from diseases to other people. On the basis of obtained results not much people are caring about their health and not taking any precautions, not leading a clean and good healthy life. Finally some people got awareness on their health issues and cleanliness.
