project correction
The collected data was written on log book & it was showed to our class mentor and he said small mistakes than required.

All the corrected information was written in rsp program book with the help of our mentor and my friends. After that program book submitted into our mentor he checked and signed that it is converted into a pdf with using mobile pdf.

The program book was kept in my home for further official review & submission.

By this long term community service project is very useful in my life by this.

I learned several skills really it is very useful to students community service project is has to know community and it is useful to help my friends & family members.

Finally, fifth week is completed my rsp manual book.

CHAPTER 5: OUTCOMES DESCRIPTION

Details of the Socio-Economic Survey of the Village/Habitation. Attach the questionnaire prepared for the survey.

I am selected Bhramunipatanam (Gulabapalem) for my csp program during this community service project went to the community for few weeks and observe the social activities & some value of the community in the community the people are very healthy and safety the people few are didnot have general knowledge because they are illiterate and my friends are give the information regarding social hygienic & advantages, disadvantages to the people.

In this community some cultural events are conducted in every year during festivals. the traditional cultural is maintained till for today. the people in most are gold shop owners and some are do there work regarding small works like kinnashope market etc.

Finally the people are very polite in most of this some are social and illiterate

Describe the problems you have identified in the community

During the survey of community service project, I observed several problems in the community. I observed mainly water problems that faced the people in this community. Chikmagalur, Patanam Gollalopalem more than 5000 people were living but the water were supplied by municipal corporation only 1 hour or 45 minutes in some days. The water is not come so the people were general amongst themselves for unavailability of water.

Another problem, observed in the community is garbage for this community only 10 are garbage bin available but the people suffering diseases & the community has bad smell so, this community had facing mainly this 2 problems.

Description of the Community awareness programme/s conducted w.r.t the problems and their outcomes.

Community awareness programme (CAP) is the one of the best programme that have been implemented by Andhra Pradesh Government.

Due to this CAP programme every its one of degree has visited the one community and recorded all problems & worry of that community so every student know the socio economic survey of these community & history. It is a very best programme. After the completion of survey they have the problems and written a letter to higher authorities to solve that problems. For that every student know the oral communication and when time to speak the people & in which way to advise the citizen in the community.

So, the people were very happy to solve the problems in the community to this the student problems so fully for implementing student CAP projects for that the government take some actions regarding community problems.

We thanks to our honourable Chief Minister Sri Jagun Mohan Reddy for implementing this community service project & special greetings to Andhra Pradesh state Council of Higher Education (APSCHE)
